Quick Help

1. Turn On

Press Power (1 second).

2. Select Search Mode

Choose your environment:

Park - general, trashy areas

Field - historic sites, coins & artefacts

Beach - dry/wet sand, surf & underwater

Each mode contains Profile 1 (general) and Profile 2 (fine, more sensitive).

3. Noise Cancel

Go to Noise Cancel in Settings → Auto Noise Cancel (~8 seconds).

4. Start Detecting

Sweep the coil close & parallel to the ground

Coil detects only while moving

5. Sensitivity

Adjust via + / - (1-25)

Use the highest stable level

6. Pinpoint

Press Pinpoint to locate the exact target center

Visualization increases as you center the coil

7. Battery

Internal Li-Ion, charge 5-6 hours via USB-A magnetic cable

8. Expedition Pack Exclusive

Includes V8X 8" Double-D Elliptical Coil (in addition to V12X)
